redpulse.co.ke

The ultimate solution for online securities trading, technical analysis and automated trading

WHY USE PULSETRADER?

- ① Seamless access to your trading account in realtime through the web platform or via the Pulsetrader mobile application for both iOS and android devices.
- ② It is an automated system for the execution of trading strategies with minimum human intervention.
- ③ Gives the user the robustness of managing their trades, gives updates on latest market information and has a wide arsenal of historical data to enable the user to make an informed trade.
- ④ Investors and traders can open, close and manage market positions.

The intuitive front-end provides quick and easy access to real-time market data, whilst enabling online and mobile trading of securities.

PULSETRADER MOBILE APPLICATIONS

The Pulsetrader mobile platform enables you to quickly take advantage of trading opportunities.

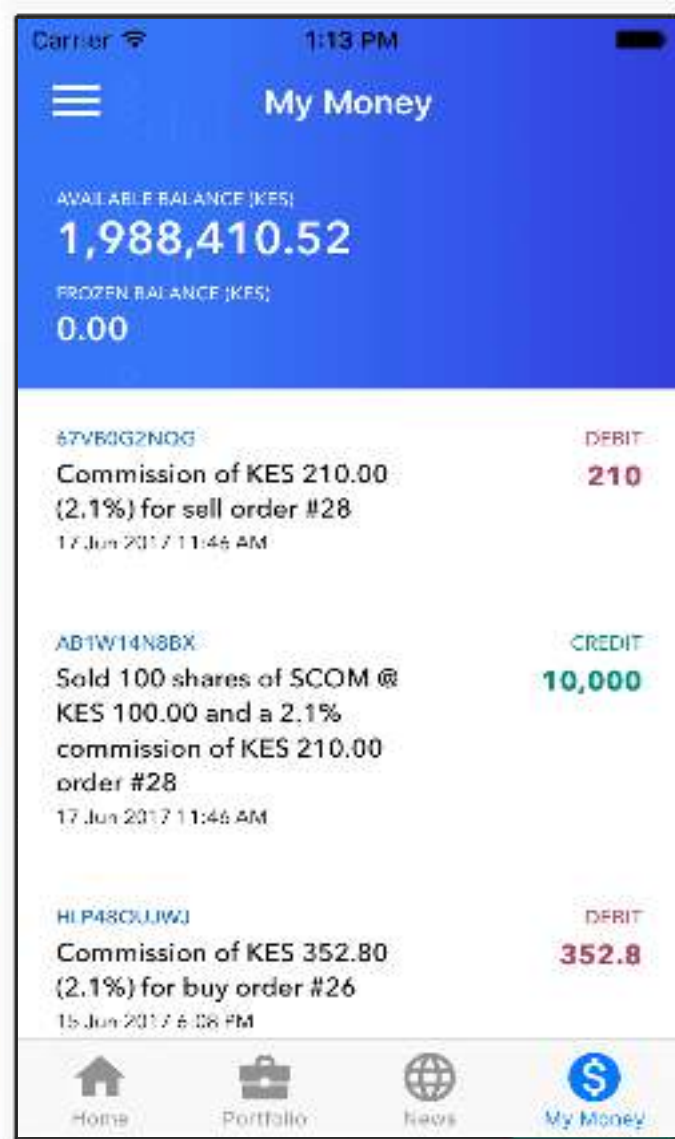

TOP FEATURES

- Seamless accessibility across different devices (laptops, tablets and mobile phone).
- Real-time access to market data is available to the trader and/or broker. Own your trading strategy or have your broker trade on your behalf.
- Historical data of all companies listed on the NSE and their performance on the market is readily available in the system
- Interact with your data in a unified, intuitive and highly customizable environment. In-depth analysis and valuable insights.

2

- **Where is my money?** The platform will indicate the amount you have as float for trading, the amount awaiting settlement should you have sold shares, and the amount in suspense account for shares you have requested to buy.
- **Where are my shares?** As you know, the CDSC is the custodian of your shares, as per usual a certificate record of your shares will be kept at the CDSC, at the broker, and periodically emailed to you by CDSC.

THE TRADER

4

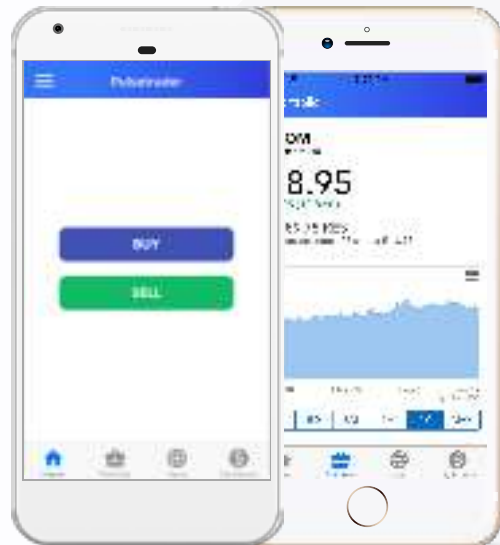

- No delays when acting on a trade
- Access to real time market information about securities from your broker.
- Limitless access to the trading platform through your mobile or web application.
- Access to historical data that helps you in making informed decisions before acting on a trade.

THE BROKER

5

- View live market data and historical trading data
- Trade on behalf of a registered user and manage all user accounts
- Manage all settlements and brokerage commissions
- Add, edit, activate or deactivate user accounts
- Broker **DOUBLE** their customer base whilst retaining staff and overhead costs

PULSETRADER MOBILE APPLICATION

The Pulsetrader mobile platform enables you to quickly take advantage of trading opportunities.

Buy and sell from anywhere, even when on holiday. Your trading strategy is personal, however the broker is readily available to perform trades on your behalf, share trading advice per security, help you implement your trading strategy and optimize your returns.
