pulseaccounts

simple, reliable, hassle free

The leading accounting solution developed for SMEs that enables you to enhance your cash flows, monitor and regulate your expenses in a secure environment.

Features

Usability

Pulse accounts provides a clean user-friendly interface requiring a small learning curve.

Every module and screen looks and works seamlessly with built in shortcuts, promoting quick learning and simple handovers.

Convenient

Pulse accounts is cloud based therefore you have access to your financial information on the go.

It easily integrates with other software solutions such as point of sale systems.

Easy Access

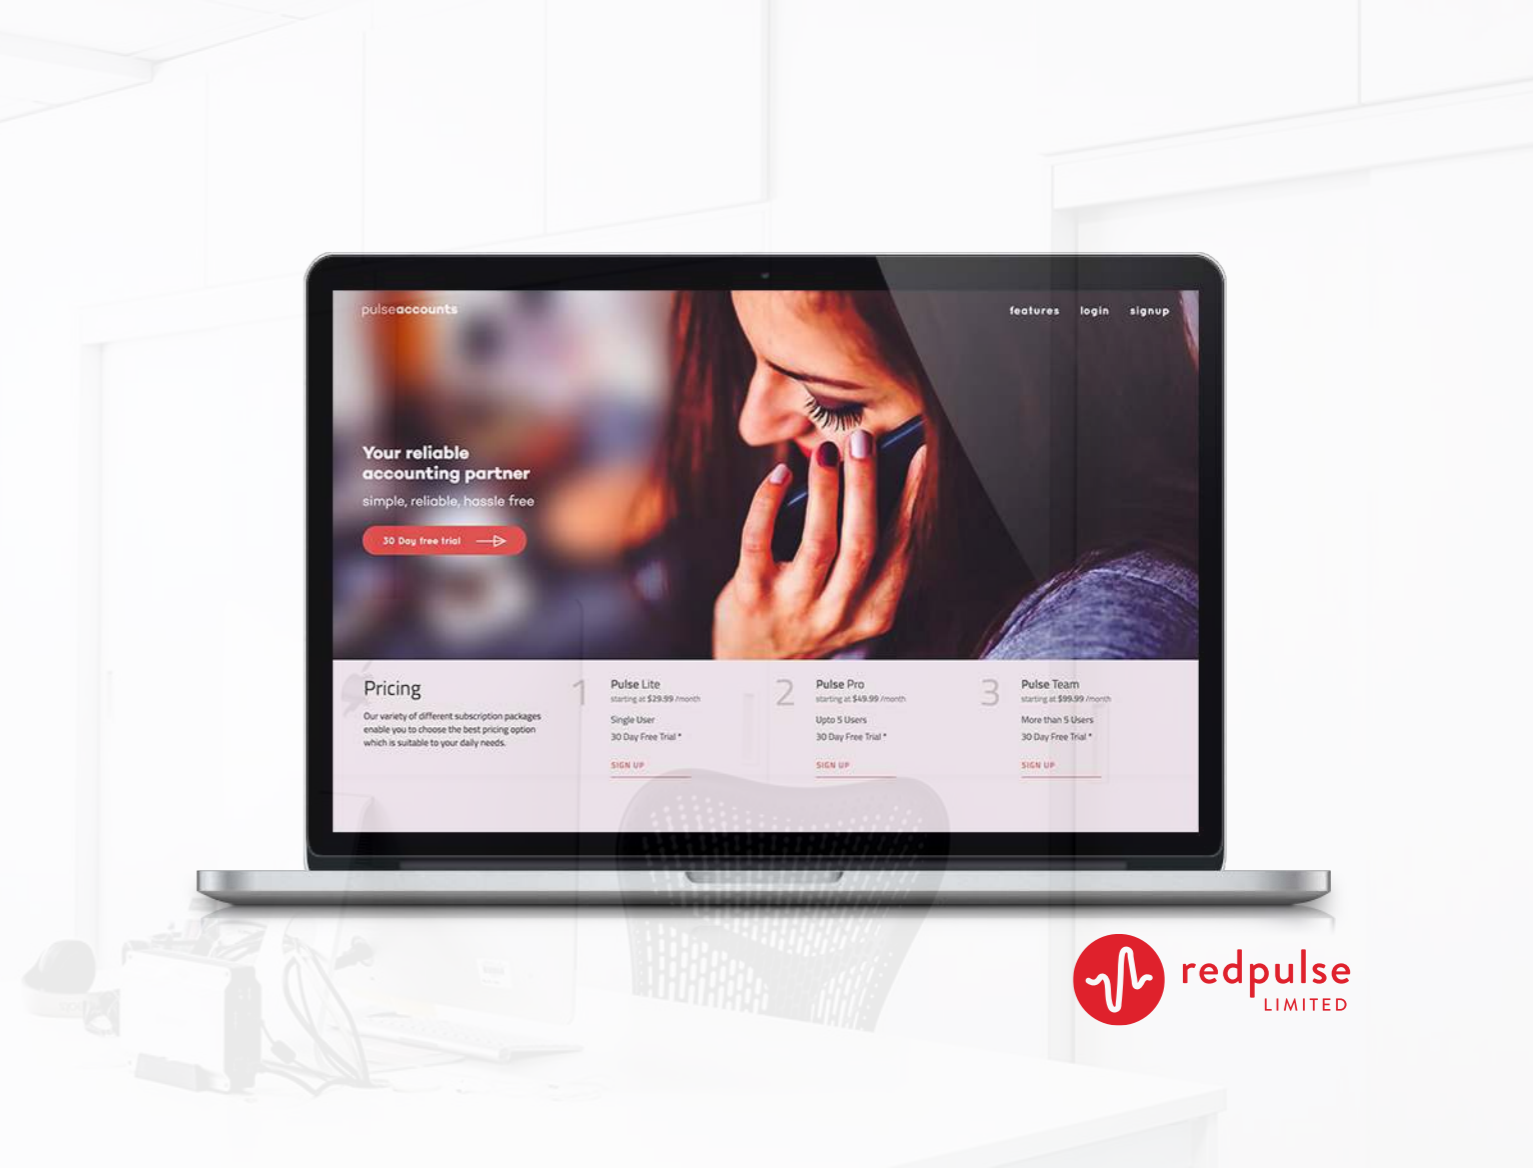

Pulseaccounts gives you access to all your accounting information at the convenience of your laptop or smart phone.

You will be able to access instant and accurate financial statements from anywhere with internet access, track clients, enter new invoices, manage expenses, and review reports while making crucial business decisions

Secure

High-level security is maintained through end to end encryption, server/client certificates.

Role based access control which gives you the ability to define different levels of access to information within the system, by defining specific groups of users and assigning them roles.

Pulseaccounts Services

- Banking
- Inventory
- Assets
- Sales and Purchases
- Contacts
- Payroll
- Reports

Accounts

Helps you manage your accounting information easily. It records your business transactions, runs reports and gets the latest financial status of your business.

It integrates fully with other modules, allowing General Ledger transactions to be posted automatically from Receivables and Payables.

Banking

The banking module enables you to record all your bank transactions. It enables you to manage all your bank accounts and petty cash accounts seamlessly.

Contacts

The contacts module helps you to keep track of your customers and suppliers.

Pulseaccounts also enables you to import from excel and export data to CSV or excel, this data includes customers lists, suppliers etc.

Inventory

Inventory module controls your inventory stock levels. It tracks all inventory transactions in real-time and helps you get instant data. This module Integrates fully with the sales and purchasing process to automatically update inventory and inventory evaluations.

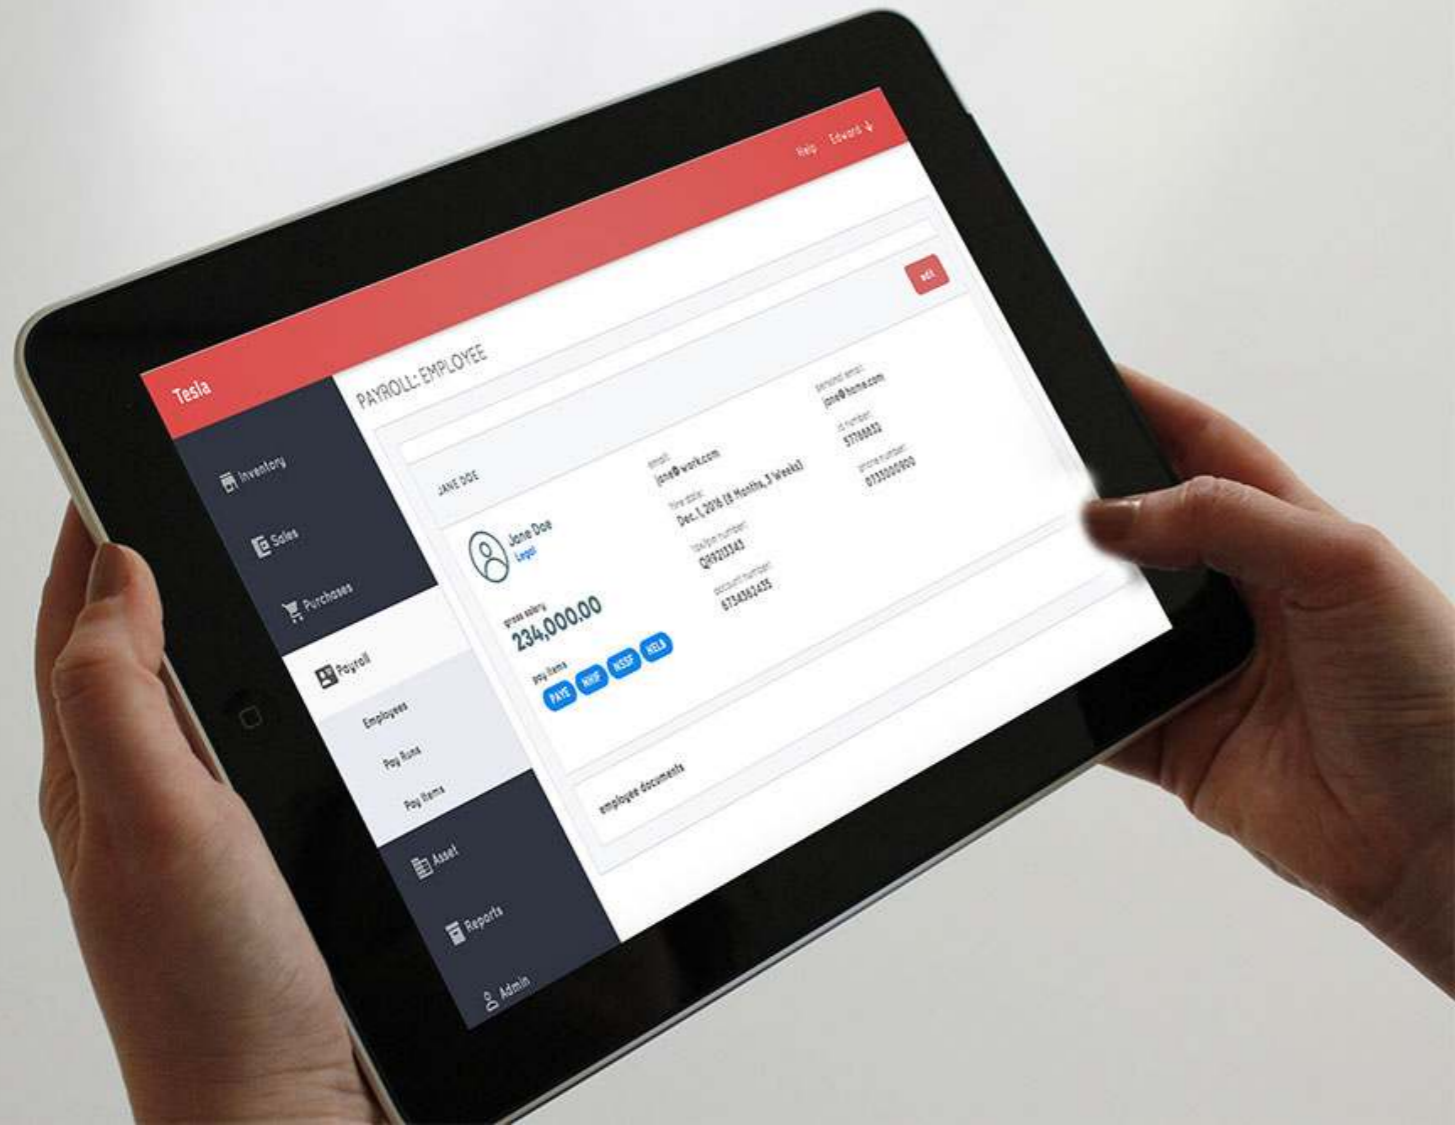

Sales

The sales module helps you in managing your invoices, receipts and cash flow in an efficient and robust manner

With the sales module you are able to:

- Manage your customers' details and all sales data
- Follow up on open invoices to better manage Cash flow
- Receive payments
- Generate sales reports
- Generate statistics reports which will tell you which items are the most profitable and which customers give you the highest revenue.

Purchases

The purchases module helps you manage your bills. It enables you to create new bills and record payments made against the bills.

This module has features such as advanced filters and automated system notifications that remind you of bills pending payment.

Payroll

The payroll module allows you to process and track payroll. Employees can easily be set up along with all of the tax rates, deductions such as NHIF, NSSF, PAYE, and additions that may be required to create payroll checks.

Assets

The assets module helps in managing all your asset from a centralized point.

Some of its features includes providing assets status information such as depreciation value, purchase price, current asset valuation, purchase reports etc.

Reports

The reports section keeps track of all accounting reports related to the pulseaccounts system modules

It helps to keep clear audit trails of transactions within the system.
